

Philip Chung

Rowland Heights, California · contact@objectboxpc.name · (626) 271-5472

Software developer with 5 years of experience building and maintaining full-stack Web applications, managing cloud infrastructure, and collaborating across functions to serve thousands to millions of users in diverse environments. Fast learner ready to start quickly, committed to quality and reliability.

Experience

Software Developer · 11/2024 – Present

Patch My PC (Remote) · *Provider of enterprise IT automation software for 5000+ customers*

- Developing systems to support automated updates via Microsoft Configuration Manager and Intune using C#/NET

Career Break · 7/2023 – 11/2024

- Member of development team laid off due to company acquisition
- Volunteered as Web developer for nonprofit art and community event; migrated agenda submissions to new Web application using Angular in first three months
- Transformed personal website server into Docker containers for easier maintenance
- Created Web application with Vue to replace paper notes for audience participation game

Applications Developer · 7/2022 – 7/2023

Life Storage (*now part of Extra Space Storage*) (Remote) · *Top-five nationwide self-storage provider*

- Led development on improved Web application to manage employee access to facilities using ASP.NET Core and Vue; provided a more intuitive interface and cut setup times in half
- Implemented features in Web-based dashboard to track customer leads and generate invoices; worked with QA team to ensure smooth operation across all facilities
- Investigated SQL Server databases and reported recurring issues with slow data retrieval

Software Development Engineer I-II · 12/2018 – 3/2022

iHerb (Irvine, California – Hybrid) · *Online health and beauty retailer with 10M+ customers globally*

- Integrated REST and SOAP/XML Web APIs to process real-time shipment data for 30+ international shipping services using .NET Core and .NET Framework
- Built CI/CD pipelines in Azure DevOps and Jenkins to automatically test Web services and expedite changes for new data requirements
- Deployed and maintained microservices in Kubernetes on AWS and GCP cloud platforms; resolved incidents quickly while communicating with business stakeholders
- Enhanced Web-based configuration UI in JavaScript with React framework to enable logistics teams to set up and configure shipping services
